

Billing Component for District Assessments

Member districts shall be billed *annually* in advance for all BOCES costs as indicated in their district assessments issued with the original adopted budget. These district assessments are due to be paid in full by July 15, unless other arrangements have been made with NW BOCES administration.

A final billing for any additional costs agreed to by districts after the original budget is adopted shall be made, if necessary, after the final budget is adopted in January. For districts participating in programs that are funded by district per pupil revenues (e.g. preschool), this would include any increases in funded pupil count for the program as compared with estimated pupil counts used for district assessments.

In the event of a fund deficit at any time and for any reason districts will be assessed immediately in a separate billing using the method stated in the Local District Assessment – BOCES General Fund policy (File: DEAA) or other method agreed upon by the Board.
